TILTON  
SCHOOL

The POWER of potential

**AT TILTON**, we see the arts as an essential element of a well-rounded education and a major contributor to the realization of potential. The arts help students develop new ways of thinking and of understanding the world around us. Tilton's Arts Program presents a creative environment with hands-on opportunities for students to discover their creative voice. Whether that passion is painting, ceramics, photography, graphic design or the performing arts, Tilton students are encouraged to explore their interests and possibly discover something new about themselves.

## The POWER of creativity

**OUR STUDIOS:** The Daly Creative Arts Center has four dedicated studios for students to practice their respective crafts. There are areas for studio arts, clay and ceramics with six potter's wheels and two kilns, graphic design with eight student work stations and a fully-functioning black and white photo lab. Rome Theater, a 250-seat theater is devoted to our performing arts and music departments.

**+5 PROGRAM:** Arts are a key component of Tilton's +5 Program. All students participate in five activities within +5, including Art & Culture, Outdoor Experience, Athletics, Community Service and Leadership. The +5 Program is a bridge that connects traditional classroom learning to first-hand experiential learning.
